Shipping and Handling Fee

Although all domestic shipping expenses are paid by NorthStar, there is an \$8.00 handling fee attached to all incoming shipments. Please keep in mind that unlike many of our competitors, this fee is assigned to the entire shipment regardless of the total quantity of patient cases included. The fee is the same whether you send one case or twenty as long as all the boxes are taped together to form a single package.

Shipping From Outside the US

Please send any cases to NorthStar pre-paid or call to make arrangements to have them billed directly to your office. Return freight charges will be applied to your account.

Scheduling

Most appliances require four days in lab. We suggest you safely schedule ten working days from the day the order leaves your office until placement. We also request that you indicate a due date that is two to three days prior to your actual date of insertion. RUSH service is also available. Please call for more information.

Note: NorthStar Orthodontics, Inc. reserves the right to adjust prices without notification. Payment terms - Net 30 days.

Disinfection Procedure

NorthStar adheres to strict guidelines concerning disinfection of incoming items. This includes all materials received, such as models, impressions, wax bites, bands, attachments, etc.

Warranty

Free repair on any appliance covered by NorthStar's Standard Warranty with receipt of original models. See www.northstarorthodontics.com for more information.

Appliance Protection

Purchasing NorthStar's appliance protection takes the stress out of lost or broken appliances. Damaged or lost appliances will be replaced once at no charge and subsequently at 50% during the coverage year for a reasonable single charge. You design how you want the plan to work in your practice. You may purchase coverage as perks for your patient or you may make it available to your patients for purchase - at whatever price you determine! Either way, it will be greatly appreciated when an appliance is lost or broken. For details and pricing information, call 800.346.0011.
